PROFILE

React Developer with **2.5 years of diverse experience** spanning web and game development. Skilled in building dynamic, scalable web applications with **React, Redux, JavaScript, and TypeScript**, alongside **1.5 years of professional Unity (C#) game development**. Experienced in ad integration, server-side deployment, and performance optimization. Recognized for strong communication, teamwork, and adaptability, with proven contributions as a valued team member in both professional settings and university computer club projects.

WORK EXPERIENCE

Ajker Patrika - **Junior Web Developer** – (Mar 2025 - Present)   Banasree, Dhaka

- Developed and maintained multiple in-house projects, including dynamic event pages and feature-rich sections for the *Ajker Patrika* website and other internal projects.
- Implemented and optimized advertisement code placements for Google Ads and other agency platforms.
- Handled server-side deployment, monitoring, and performance optimization to ensure stable project delivery.

Brain Station 23 - **Frontend Developer (Trainee)- (**Sep 2024 – Present)   4 Mohakhali, Dhaka

- Collaborated with a colleague to develop 'PharmaSphere,' a pharmacy-based e-commerce site built using the MERN stack. Focused on implementing secure payment integrations, efficient database structures, and a user-friendly interface.
- Developed responsive web platforms, including an e-commerce site with dynamic product displays, user authentication, and cart management, and a movie listing site featuring top-rated movies, API-based data fetching, and a wishlist feature. Leveraged React, TypeScript, Tailwind CSS, REST APIs, Context API and Redux to create user-friendly, intuitive, and responsive experiences focused on seamless navigation and functionality.

Imaginary Workstation - **Junior Unity Developer** - (Aug 2023 – Oct 2024)   Nikunjo, Dhaka

- Started independently and after some time joined a team of 5 more colleagues with key roles in company.
- Developed 2D and 3D games for Android.
- Created particle systems, shaders, textures, and animations to simulate various natural and magical phenomena

PROJECTS

Kamrul Hasan – (April-May) 2025

- Technology (React, MonggoDB, MySQL, ExpressJs, NodeJs, javaScript, bootstrap)
- Dynamic personal website for journalist Kamrul Hasan, showcases writings,albums, and reports etc in Bengali and features a fully customizable admin panel for managing all content and menus.
- My role - developed both frontend and backend, implemented dynamic features, built the admin panel, and ensured seamless integration of all components.

PharmaSphere – Nov 2024

- Technology (React, MonggoDB, ExpressJs, NodeJs, javaScript, useContextApi, React Router, tailwind)
- A pharmacy-based e-commerce platform offering a seamless shopping experience for medicines and healthcare products.
- My role - Developed responsive UI, product browsing, cart, and checkout functionality, and integrated APIs for real-time updates.

SnapShop – Oct 2024

- Technology (React, TypeScript, React hook form, Yup, React Router, UseContextApi)
- This is a responsive e-commerce platform with product management, user authentication, user information and user-specific functionalities such as a wishlist and shopping cart.
- My role - Developed the full e-commerce frontend integrated FakeStoreAPI for product data, implemented authentication, protected routes, and user-specific features such as wishlist and shopping cart.

FoodCardApp (personal) – Jan 2025

- Technology (React, JavaScript, Redux, Bootstrap)
- A React-based food ordering application where users can browse food items, add products to their cart, view product details, and manage their cart by increasing or decreasing product quantities or removing items.
- My role - Developed the full application, created a manual data array for food items, implemented UI

Movie List – Oct 2024

- Technology (React, JavaScript, tailwind, RapidAPI movies Apis)
- A user-friendly website to explore movies and TV shows.
- My role – Build the full movie list website frontend and Api integration.

SKILLS

- **Programming Language (**JavaScript, TypeScript, Python, Java, C, C#)
- **Web** (Html, CSS, ReactJS, Redux, NodeJS, ExpressJS, React router, Context API, Tailwind CSS, Bootstrap)
- **Database** (MongoDB, MySQL, PostgreSQL)
- **Others** (Git, GitHub, Netlify, Teamwork, Communication, Leadership. Postman, Figma, Unity)

EDUCATION

B.S.C in CSE - From **Green University of Bangladesh.**

Result: CGPA – 3.30 (out of 4.00), year of passing (2018 –2022)

CERTIFICATIONS

Intermediate SQL Queeis - DataCamp	October 2021
Intro to Machine Learning - Kaggle	September 2021
Python Data Science Toolbox (Part 1) - DataCamp	August 2021
Python Data Science Toolbox (Part 2) - DataCamp	August 2021

STRENGTHS & SOFT SKILLS

- **Interpersonal Skills:** Listen attentively, speak candidly, and treat others respectfully.
- **Leadership & Team Formation:** Proven ability to form and lead effective teams in multiple projects, ensuring alignment with project goals and timely delivery.
- **Logistics & Project Management:** Skilled in coordinating project milestones, timelines, and resources, ensuring smooth progress and successful completion of deliverables.
- **Problem-Solving & Critical Thinking:** Proven ability to handle complex challenges, develop strategic solutions, and drive projects to success.
